

Download Ch 9 Forces Inside Earth Study Guide

Summary of the Chapter. All landforms are composed of rocks or their weathered by products. Three main types of rocks can be identified on the Earth's surface: igneous, sedimentary and metamorphic. Earth is made up of several different layers, each with unique properties. In this video lesson, you will identify each layer of Earth and how it...So the sun carries on its life as a main-sequence star, burning up the hydrogen fuel in its core. As it does so, the sun's energy increases. This increase in energy isn't too good for Earth. Earth is the third planet from the Sun and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago.
