

Download Decisions Health Resource Preventing Violence

Preventing violence against girls and young women is understudied in poor countries. • Interventions often target discrete forms of violence, but poly-victimization is common. As the global community marks Women's International Day on March 8, the World Bank is putting more emphasis on preventing the potential violence and harassment that women and girls may face while using public transport. In contrast, if the health advocates' more-guns-mean-more-murder shibboleth were true, massive increases in guns should translate into massive increases in murders. Occupational health and safety changes. An improved OHS system to better protect workers and ensure they have the same rights as other Canadians came into effect on June 1, 2018.
