

Download Dna Rna Protein Synthesis And Mutations Test Review Answers

Learn.Genetics visitors, We're asking for your help. For over 20 years, the Learn.Genetics website has provided engaging, multimedia educational materials at no cost. In this lesson, you will gain a thorough understanding of how transcription works. We will investigate how DNA is transcribed into RNA with the help of a promoter and RNA polymerase. Proteins are assembled from amino acids using information encoded in genes. Each protein has its own unique amino acid sequence that is specified by the nucleotide sequence of the gene encoding this protein. Protein synthesis is a fancy term that means making protein. In this lesson, we'll learn about protein synthesis and the two steps of this process: transcription and translation. 2018-04-06
