

# Download Land Use And Land Cover Mapping In Europe Practices Trends

Land use and land cover (LULC) as well as its changes (LUCC) are an interplay between bio-geophysical characteristics of the landscape and climate as well as the complex human interaction including its different patterns of utilization superimposed on the natural vegetation. A new feature introduced to the 2015 Conference is a full day focusing on solutions for land administration and management. Service providers and technology vendors have been invited to present solutions in a show-and-tell day. Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. What is the Land Matrix? The Land Matrix is a global and independent land monitoring initiative. Our goal is to facilitate an open development community of citizens, researchers, policy-makers and technology specialists to promote transparency and accountability in decisions over land and investment.
