Linezolid is an antibiotic used for the treatment of infections caused by Gram-positive bacteria that are resistant to other antibiotics. Linezolid is active against most Gram-positive bacteria that cause disease, including streptococci, vancomycin-resistant enterococci (VRE), and methicillin-resistant *Staphylococcus aureus* (MRSA). Quality Management System - integrating GMP into ISO 3 B. Introduction Because the pharmaceutical industry has traditionally focused upon the application of Good Introduction to Microbial Media. Microbiological studies require the availability of different species of bacteria, yeast or viruses in the laboratory. Thiosulfate-citrate-bile salts-sucrose agar, or TCBS agar, is a type of selective agar culture plate that is used in microbiology laboratories to isolate *Vibrio* species. TCBS agar is highly selective for the isolation of *V. cholerae* and *V. parahaemolyticus* as well as other *Vibrio* species.
