

Download Muscular System Skeletal Muscle Tissue Answers

Skeletal System and Muscular System. People have skeletal systems made up of over 200 bones. Actually, the exact number in adults is 206 if you were wondering. The muscular system is the biological system of humans that produces movement. The muscular system, in vertebrates, is controlled through the nervous system, although some muscles, like cardiac muscle, can be completely autonomous. The Skeletal System - ... Because of my bones breaking and shifting over in the wrong place, my foot must now be broken again while under surgery and get screws to be permanently placed. Without the muscular system we wouldn't be able to move, at all. We would be no different than a plastic skeleton hanging up in a biology class that is covered in a layer of dermis.
