

# Download Reinforcement Activity 2

In behavioral psychology, reinforcement is a consequence applied that will strengthen an organism's future behavior whenever that behavior is preceded by a specific antecedent stimulus. Instructions: The items in this questionnaire refer to things and experiences that may give a person joy, satisfaction, and/or pleasurable feelings. Premack's principle, or the relativity theory of reinforcement, states that more probable behaviors will reinforce less probable behaviors. ...Positive Reinforcement . This is possibly the easiest, most effective consequence for a trainer to control (and easy to understand, too!). Positive reinforcement means starting or adding Something Good, something the animal likes or enjoys.
