

# **Download Strategies For River Basin Management Environmental Integration Of Land And Water In A River Basin**

4 1.2. WORK METHODOLOGY Prior to the development of this Strategic Plan has been carried out the analysis of a system of indicators to monitor, assess and report on the current situation regarding water management. Drought policies and strategies. Policies and strategies provide the framework and guidance to support the implementation of best management practices and suitable interventions. Learning to live with drought and climate variability Examples of existing programmes and practices. The programmes and practices discussed below have been or are currently being implemented and supported by governments of basin countries, international agencies, local institutions, communities and farmers. The environmental impacts of irrigation relate to the changes in quantity and quality of soil and water as a result of irrigation and the effects on natural and social conditions in river basins and downstream of an irrigation scheme.
