Nicolas Bourbaki (French pronunciation: [nikɔla buʁbaki]) was the collective pseudonym of a group of (mainly French) mathematicians. Their aim was to reformulate mathematics on an extremely abstract and formal but self-contained basis in a series of books beginning in 1935. It seems like there's enough information here (and elsewhere) about the Bourbaki series in general so I won't comment on that. Amir Dan Aczel (/ ˈ ʌ m ɪ r ˈ ɛ z əl /; November 6, 1950 – November 26, 2015) was an Israeli-born American lecturer in mathematics and the history of mathematics and science, and an author of popular books on mathematics and science.
