

Download Wiring Diagrams Marine John Deere Engines

"I know this has been covered many times on this board but I can't seem to find what I need. The 4 wires coming from the trim limit & trim sender were frayed and unhooked when I bought the boat. I've since replaced the units/wires but can't figure out where to hook them up and I really need that trim gauge to work. The part I don't know...The John Deere exhaust filter is integrated into the engine design and electronics to provide a seamless operator experience. The engine control unit (ECU) and exhaust temperature management (ETM) system work together to continuously regenerate the exhaust filter using a natural cleaning process sometimes referred to as passive regeneration. The New 9R Series Tractors are built to defy convention. With more engine horsepower (370 - 620 engine hp) and efficient FT4 engine technology, these machines welcome a good challenge." what options do I have for replacement of a 470. I like its power, but it's not dependable. I am scared to go too far off shore. The problem is usually temps climb at near full throttle, but not all the time, strange."
